CRESSI

CARES

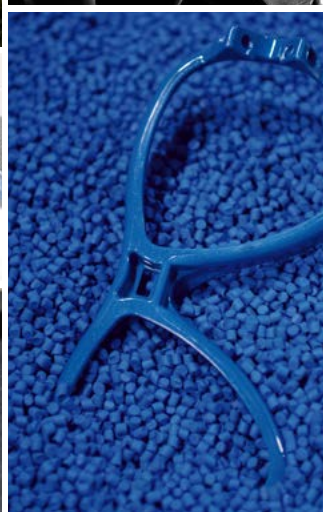

Cressi was founded, and still lives, just steps from the sea in **Genoa**. We breathe sea air in everything we do, and every one of our products is inspired by the incredible beauty of the waters we see before us.

The only way to fight pollution in the sea is to be aware and active, first hand.

Cressi decided to take some concrete actions

01

CRESSI HEADQUARTERS IN GENOA SUPPLIED BY RENEWABLE ENERGY

Cressi is proud to announce that its Genoa factory is operating with 100% renewable energy. Alternative and renewable energy sources are crucial for the environmental health of the world's seas and for our future. The only way to fight ocean pollution and to conserve the beauty and health of the planet's oceans is to be aware and proactive. At Cressi, we decided to take action: 100% of the energy used in our Genoa factory is clean and completely green.

02

CRESSI'S PACKAGING

We live by the sea, we work with the sea and we love the sea, so it's our responsibility to give it care and respect. Our goal is to replace all plastic packaging with alternative sustainable solutions following our policy.

“

In Cressi we have always focused on sustainability by orienting ourselves to the protection of the environment and especially of our seas. Since 2019 production and offices are powered by renewable energy and today we can proudly say that our establishment is zero impact. We follow the sustainable direction on many fronts, such as in the choice of packaging materials, where we are reducing plastic and replacing it with recycled or recyclable materials. We are also very active in sponsoring events related to cleaning up the seas to ensure that future generations have our same opportunities.”

OURSELVES
OURSELVES
OURSELVES
OURSELVES
OURSELVES

WE ARE FAMILY

1930

1938

Brothers Egidio and Nanni Cressi start to handcraft the first masks and spearfishing guns. These are the origins of Cressi, the oldest scuba diving equipment company worldwide.

1940

1943

The first Cressi mask, The Sirena, was hand crafted in 1943. It remained in the catalogue, with various updates, for more than 30 years.

1946

The Cressi company is officially founded in Genova, Italy.

1947

In 1947 the first oxygen rebreather was produced; Aro AR47. It was already highly advanced and fitted with sophisticated technical solutions, like the condensation receptacle.

Pinocchio

1950

1952

Pinocchio Mask, which makes equalization possible. It is a major innovation in the early '50s. It is the most famous and most sold mask in the world's history, and it is still included in the catalogue.

1953

Rondine Fins - Also in the field of fins, Cressi invented the model that has inspired all other manufacturers, the first floating model in the world.

1957

Cressi athlete Mario Catalani wins the first spearfishing World championship and get the gold medal in Jugoslavia.

1960

1965

Cressi opened one of the first workshops that specialized in producing optical masks. Thanks to Cressi, even people with visual defects could now get full enjoyment of the underwater universe.

1970

1970

Equi-vest - In 1970, Cressi was the first manufacturer in the world to produce Equi-Vest, a futuristic jacket that became one with the scuba tank, supplied by a hose that drew air directly from the first stage. This was the first incarnation of the modern BC.

1970

Rondine L long fins - The world leader of molding rubber fins, Cressi developed the Rondine L long fins, which enabled Jacques Mayol to go onto achieve his astonishing freediving records.

1979

Fins range - Alongside the various rubber fin models, a futuristic model was presented with a reinforced nylon blade, called the Rondine Gara, a fin that thirty years down the line is still going strong, and has been adopted by world class freedivers and spearfishermen the world over.

1980

1983

Jacques Mayol, the first man in the world to challenge the 100m barrier. He reached a depth of 105 meters. The episode has gone down in history, the record was obtained in the waters of the island of Elba in 1983.

1988

Apache Arbalète - Cressi produced a complete range of Arbalète spearguns to join the pneumatic guns, called the Apache, which very soon became the Champion speargun in the world.

1989

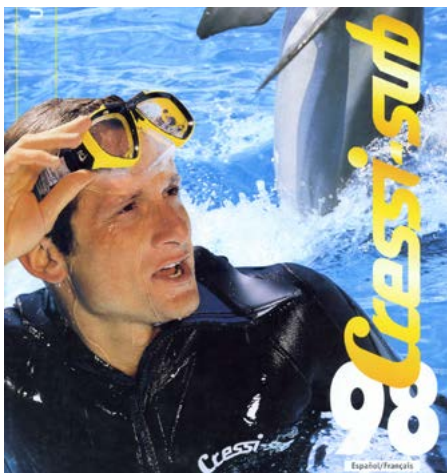

Cressi athlete Renzo Mazzarri wins the spearfishing world title in Italy.

1990

1990

Cressi continues its international expansion and the products are by now distributed in over 90 countries world wide.

1999

Cressi Athlete Umberto Pelizzari sets the freediving "No Limits Absolute Variable Weight" World Record in Portofino (Italy) reaching the depth of 150 meters.

Big Eyes Evolution

2000

2000

Big Eyes was the first mask in the world with raked lenses in an upside-down teardrop shape, an innovative form that gives the diver a complete view of all the equipment worn. They became the most widely copied and imitated mask in the world, a gratifying appreciation of how far ahead Cressi is in the design of its products.

Leonardo

2010

2011

The Leonardo dive computer watch is introduced, the first of the products designed in-house by Cressi Elettronica in order to guarantee optimum quality, safety and reliability.

2013

The French freediving champion Guillaume Néry becomes a Cressi product endorser. The Giotto dive computer watch is introduced; it processes the data from repeat multi-day dives and dives with gas mixtures and also benefits from the Cressi RGBM algorithm. The Tracina wetsuit for spearfishing is introduced in a new and exclusive camouflage Dark Digital Specter Pat Cressi.

2020

2021

Hydrosports is the result of Cressi's experience, consisting of tradition, innovation and quality, since 1946. With its close relationship to the sea environment, the Cressi team has been able to develop this new collection in response to the direct needs it encountered in practice and through water tests on its products.

TODAY

The Cressi company is still entirely owned by the Cressi family, which carries on with the same passion, the work started by brothers Nanni and Egidio Cressi. Its spirit lies in the manufacturing tradition, with a clear preference for the conception and realization of its products in-house, from the initial design through to the smallest details. Cressi focuses on those who love all facets of the aquatic world. The company has never exaggerated with successful products on the market, but has instead always invested in research and development to the benefit of quality and reliability, the evolution of materials.

UNIQUE STYLE

LIGURIA. OUR LAND, OUR SEA

It was to fish in the depths of Portofino and San Fruttuoso that, just before the Second World War, a group of friends thought of new equipment. Situated between the French border and Tuscany, Liguria is one of the smallest regions in Italy. The Italian riviera is reflected in the blue Mediterranean Sea, but is also surrounded by mountains that drop sheer into the sea. Vegetation forms the backdrop to some of the country's most popular and well-known seaside resorts.

The coasts are generally high, rocky, jagged, especially in the Riviera di Levante, while in the Ponente there is an almost perfect alternation between sheer cliffs and sandy beaches.

**It couldn't be any other way,
the strong passion for the sea
finds its place in a unique setting
with depths to explore.**

"THE SEA IN LIGURIA, ESPECIALLY AROUND THE PORTOFINO PROMONTORY, IS EXTRAORDINARILY BEAUTIFUL AND, WHAT'S MORE, ACCESSIBLE WITHOUT TOO MANY PROBLEMS. THIS HAS PLAYED AN IMPORTANT ROLE IN THE BIRTH AND GROWTH OF A DIVING EQUIPMENT CENTRE IN THESE PARTS."

Antonio Cressi

"I'M PROUD TO HAVE ALWAYS MANUFACTURED OUR MOST STRATEGIC PRODUCTS AT OUR HEADQUARTERS IN GENOVA, ITALY."

ANTONIO CRESSI

THE CRESSI HEADQUARTERS

In 1989, the company was enlarged, moving it to Via Adamoli, along the Bisagno valley in Genoa. And then came the electronics department. Since 2008 we have created a research and development department for this sector and so we produce directly the many control instruments that are now used during diving. With 150 employees and

seven branches, Cressi is a world leader in the production of diving equipment, innovation, and development with exports accounting for 80% of turnover.

BUT THE ONLY ONE STILL RUN BY A FAMILY

WHERE WE ARE

WORLDWIDE

Our headquarters is based in Genoa, and we also have eight branches: USA, Mexico, Brazil, France, Spain, China, Thailand and Australia. 70% of our products are made in Italy in our own factory, in Genoa. 10% of our products are made in our own production facility in Hungary and the remaining 20% is sourced from selected high-quality suppliers from Asia.

We have around 10,000 shops all over the world, and our products are sold in over 100 countries.

CRESSI SPEARFISHING NEW COLLECTION

With this catalogue, we would like to highlight our origins, which have distinguished us over the years. Today, with the same passion as then, we follow the needs of our customers, from the beginners to the most ambitious athletes, sure of providing products suitable for all needs, always focusing on technology and results.

In these 76 years the company has always preserved its DNA, which is well represented by Cressi logo. The "C" logo with the mermaid, in the origin with the speargun, is recognisable all over the world as a prestigious brand of watersports and spearfishing.

Our goal is to provide a complete vision of our products Dedicated to all those who make spearfishing their passion.

The work undertaken over the years carries out a constant renewal of products with strict testing and always new technologies, placing us at the top for reliability, performance and durability.

All this takes in thanks to a continuous dialogue between our designers, who are always ready to make the best improvements, and our ambassadors, expert testers who have made the sea their home.

The philosophy of the Cressi family is always the same, first of all the technique and then everything else... this catalogue is an excellent example.

BORN FROM THE SEA

CRESSI SPEARFISHING & SUSTAINABILITY

Spearfishing has become **the most sustainable fishing method** for many reasons. One of the biggest is that it has the most selective catch, by species, size, and quantity.

It also has the least problems for the environment, no by-catch, it doesn't need any bait, almost no gear loss, virtually no non-targeted species impact, and no harm to the surrounding **underwater environment**.

When using the Cressi gear and taking only high percentage shots, there is a low non-retrieval rate. **By following all fishing regulations and laws, and shooting only fish that are good to eat, and always eating your catch.**

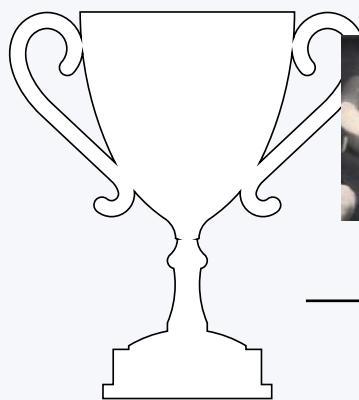

Cressi cares to preserve the planet reducing its environmental impact.

Egidio and Nanni Cressi first founded the Cressi company to service the growing sport of spearfishing, and the Cressi name has been associated with the sport ever since.

Cressi-sponsored athletes have won 11 world spearfishing titles in that time, and 15 Italian championships.

The company offers an extensive line of gear. These include pneumatic and band-powered guns, masks, a lot of models of freediving fins and a wide range of accessories, such as bags, shafts, reels and so on.

MORE THAN ANYONE ELSE!

**ANGELO ASCIONE**

Italy

**Angelo Ascione**

I've had several successes in both national and international spearfishing competitions. I'm a freediving and spearfishing instructor, and today I'm constantly dedicated to this. I've always been fascinated by the aquatic world. The sea is my passion which is second only to my family.

STEFANO BELLANI

Italy

**Stefano Bellani**

Since I was young, in my free time I was always out at sea, in the blue waters of Corsica, fishing tunas and amberjacks. Constantly looking for new places to explore and to practise my passion. People calls me a real champion, I'm proud to have the opportunity to share my underwater world.

PHILIPPE CHARRIER

France

I was born in July 1977 in Cannes, France. I am a professional fisherman. I love the sea and every time is a new discovery. In 2001 I entered the world of Cressi, which has sponsored me ever since. I was on the French national underwater fishing team between 1999 and 2005.

CRISTIAN CORRIAS

Italy

**Kristian Corrias**

I'm very connected to the sea, it gives me sense of freedom even when it's rough and seems to want to push me away. I've always had the passion for spearfishing since I was a teenager, I waited impatiently for the specialized magazines to admire the champions of the time and read their stories.

SERGIO DE JULIÁN ARRIOLA

Spain

**Sergio De Julian Arriola**

Sergio has always shown that his passion goes beyond sport or hobby, it's his way of enjoying life. A very physically prepared fisherman with an innate aquatic ability, he is an extreme competitor who performs impressive fishing rhythms at medium depths.

LUCA DELLA SANTA

USA

**lucads13**

I was raised on the beaches of North Carolina and South Florida, where my love for the ocean began. Growing up, I was fishing, diving, or surfing any chance I could get. With my love for the ocean and wanting to experience it in different ways, I have continued to share the passion for the sport.

PEDRO DOMINGUES

Portugal

Spearfishing for me started at the age of 14 after the death of my father, but I have been connected to the sea since I was a child, going spearfishing during my holidays in Setúbal. I like fishing for big bass, as well as bream, snapper, corvina, etc. The more difficult it gets, the more I like it.

JULIÁN RIVAS

Spain

**jrivaspq**

Member of the Spanish National Team, he started fishing in his native Asturias in the surroundings of Gijón in the Cantabrian Sea, when he was a child. He especially likes the area of Cartagena where you can find both vertical cliffs that deepen quickly as well as platform areas.

/ OUR AMBASSADORS

NICOLÒ COLUCCELLI

Italy

nico_cressiteam

I love spearfishing and I compete for the Underwater Club of Sestri Levante, where I live. This year I will take part in the Italian Championships for the first time. I am honored to be part of this team, as it was my dream since I was a child. I will continue to compete hoping for the best possible results.

DAVID GOTTSCHALK

Spain

David Gottschalk

David is a passionate promoter of more responsible and selective spearfishing. He has made numerous short films available on his YouTube channel "Hasta el Fondo" on different topics such as the defence of spearfishing, learning and deep-sea fishing techniques.

ÓSCAR HIDALGO

Spain

Oscar Hidalgo

In his competitive career he has won 3 individual and 3 team championships in Catalonia. He became passionate about spearfishing at the age of 7; since then, his passion has not stopped growing. He is very experienced in the behaviour of fish and is a great observer of their habits.

ÁNGEL CRUZ

Spain

Angel Cruz

Since he was a child he used to fish with his father, at the age of 19 the sea became his whole life, his training, his profession and his sporting life. Champion of Spain 2021 and 9 times regional champion. Undoubtedly, the Cantabrian fisherman with the best career.

ALEJANDRA PRAT

Spain

apogonimberbis

Since she was a child her parents initiated her in the practice of spearfishing in Cap de Creus. Due to her great passion, she has made a name for herself in both men's and women's competitions, winning several titles. She's part of the Spanish national team in the next World Championship to be held in Sardinia.

FRANCISCO LOFFREDI

Brazil

franciscoloffredi

Born and raised in Rio de Janeiro, Brazil, where I learned to fish. Spearfishing is a way of life, and my love for the sea has led me to be a proponent of sustainable spearfishing. I have won the biggest fish trophy at the Blue Water World Cup three times. In 2013, I won all three trophies of the World Cup: individual, team and biggest fish.

FRANCESCO DIVERSI

Italy

diversifrancesco

Graduated in Molecular Biology in Pisa, where my passion for the sea began. Particularly for sailing, achieving success in national and international competitions, and for spearfishing. In 2008 I won the Italian team championship and in 2017 I started working with Cressi.

SANTI LÓPEZ CID

Spain

Probably the most prestigious and recognised Spanish spearfisherman in the world. He has won 7 European Championships and 4 World Championships. He started spearfishing in Mallorca, when he found a speargun, a mask and a snorkel hidden in some bushes. Many call him "the magician" for his magical performances in championships that have left the other competitors speechless.

DARIO MACCIONI

Italy

dariomaccioni

Being part of the Cressi Team makes me proud, above all because since I was 8 years old my favourite brand for its colours, logo and the champions that represented it is Cressi Sub. My life is dedicated to my family and to spearfishing. I continue my competitive career giving my best with the hope that it will last as long as possible.

RICARDO GONZÁLEZ

Spain

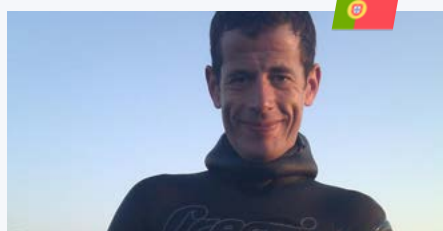

Ricardo González González

Ricardo is considered an exemplary sportsman and a gentleman in every aspect of his life. In his long competitive career, he has won 8 individual Galician Championships and 3 team championships. Ricardo is a lover of the waters of Galicia and has also been a Cressi salesman for 20 years.

PAULO MOREIRA

Portugal

I'm a Portuguese spearfisherman. I made some videos for YouTube with "MAR Y CAZA TV". I enjoy sharing this passion and also the challenge of not only catching fishes but also knowing how to capture the right moment for filming. Determination, perseverance, sacrifice: I believe that dedication strengthens talent. Also loyalty, for example to your competitors... what else? I'm always ready for ambush.

JOÃO PEIXEIRO

Portugal

j_peixeiro

I'm a lover of the aquatic world and I like the idea of promoting the spearfishing to break the existing taboo, to exchange knowledge and fishing techniques. I am very active on social media for this reason too, it's nice to meet people who share the same passion as you.

/ OUR AMBASSADORS

STJEPKO KESIC

Croatia

Stjepko Kesic

I'm part of the Cressi team and won my first title as Croatian National Champion in 2019. Then I won my second title in 2020, a two days championship was held in the area of half island Istra and it was organized by the Club Delfin from Pula, it was a very satisfying experience.

ANTONINO PIRAS

Italy

Antonino Piras (Nino)

When I was 12 years old the most important thing for me was to jump into the sea to see everything that was inside. I've turned this passion into my sport and I consider myself extremely lucky cause my passion has also led to my job as Cressi's agent, which gives me satisfaction in being the team manager of this wonderful group of athletes.

ANDREA SETTIMI

Italy

and_set_sea

A lifestyle and family tradition that I have experienced since I was 12 years old. The emotions and peace that I constantly feel underwater give me the strength to look ahead and set myself new goals. I love everything about freediving, from the difficulties to the satisfaction, and I always try to learn from it. The sea seems always to understand me.

AINHOA ABELLÁN LÓPEZ

Spain

Ainhoa YPunto

She started practising it as child with her father. She has obtained good classifications, currently runner-up of Spain and she will be the main fisherwoman in the Spanish national team in the next world championship in Sardinia. She is specialised in fishing in shallow waters where she gets an amazing advantage.

FRANCESCO PIRAS

Italy

pirasf

My love for the water has been transmitted from father to son. Organising fishing expeditions is my greatest passion. I practice in all seasons and with different techniques, I live underwater all year round. In September 2016, in the waters of Taranto, I won the Italian Championship of Apnea Fishing Qualification (second category).

ALEXANDRU TEODORESCU

UK

selenitry

I'm part of Cressi Athletes team and I'm so happy to have joined this family. This cooperation allows me to practice my passion for this sport. I have the opportunity to experience and try new products all the time, this also means that I can spend as much time as possible into the water and enjoy every my spearfishing sessions.

DAVID MONTERO

Spain

monterosub

He discovered his background at the age of 14 years. He started competing in 2007 at the age of 27, achieving a third place in his debut, which encouraged him to keep trying. He is a great fisherman at medium-high depths, a very good strategist and meticulous in training for competitions.

JUAN RAMÓN PÉREZ CABELLO

Spain

juanramonperezcabello

Born a few meters from the shore of the Atlantic Ocean, Juan Ramón Pérez breathed salt water from his first breaths. A child surrounded by brothers and friends who loved spearfishing, in which he started very young. A life linked to the sea and to CRESSI, the brand he started with in 1998.

INTERNATIONAL WARRANTY POLICY

Cressi in accordance with Directive 1999/44/CE guarantees its products to be defect-free in conformity with the operating instructions for a period of 24 months from the date of purchase for the consumer, and its efficiency and quality of the manufacture and quality of the product designed to be used in the conditions of use specified in the guarantee. This warranty is valid in the following manner:

SPEARFISHING COMPUTERS

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Flooding caused by incorrect battery installation, LCD display in the case of damage due to negligence or blows, damage due to leaks of substances from the battery (the guarantee is valid if the computer is new and has not been used), damage caused by dead or non-functioning batteries, damage due to negligence, blows, or to normal wear and tear.

ANALOG DEVICES

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
Exceptions: Damage due to negligence, blows, or normal wear and tear.

DRY SUITS

Two (2) years from the date of purchase (for rental or teaching use: 6 months for operating defects and 24 months for inherent defects).
Exceptions: Consumable parts, damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, improper use, blows, or normal wear and tear.

MASKS, FINS, MOUTHPIECES, GOGGLES

Two (2) years from the date of purchase (for rental or teaching use: 12 months for good operations and 24 months for defects of conformity).
Exceptions: Alterations in the color of the silicone, all damage due to exposure to the sun or the effect of chemical or environmental agents, damage due to negligence, improper use, blows, or normal wear and tear.

SPEARGUNS, KNIVES, BAGS, WETSUITS, BOOTS, GLOVES, AND ALL REMAINING PRODUCTS AND CONSUMABLE PARTS

Two (2) years from the date of purchase (24 months for inherent flaws).
Exceptions: Damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, blows, or normal wear and tear.

NEW COLOR 2023

FREEDIVING COMPUTER WATCH

With a case diameter of only 48 mm and a high-contrast display of 35 mm, King is an extremely compact watch-computer specific for freediving. This innovative product boasts an algorithm developed in Cressi, which protects the freediver from the risk of Taravana, and a function that avoids the risk of pulmonary edema.

Mineral glass, heavy duty case with steel buttons for resistance to water pressure up to 120 m, metal bezel in AISI 316 steel with surface treatment and inkfilled technology for the inscription, silicone and polyamide strap (to prevent tears and breakage) with stainless steel buckle.

UNLIMITED POWER

Anticorodal black frame with integrated spear guide, grip made of engineering plastic reinforced with glass fibre, interchangeable high or low sternal support. Ultra-light triggering case with trigger, release mechanism and line ring on the side in AISI 316, machined from solid with a CNC process. The shock absorber makes silent the release of the shaft. Reversible side-safety mechanism. Reinforced reel with steel pin buckle. Head for double elastic with magnetic spear lock: as soon as the spear is put in place, it is held by

two magnets mounted in a watertight chamber. This characteristic guarantees maximum speed of reset without the disadvantages of conventional mechanical restraint systems. The speargun is supplied with double 16 mm natural latex band, with Dyneema wishbone.

MOICANO

PERFECT FOR THE AMBUSH

Moicano is a speargun for fast fishing with its excellent handling thanks to its Ø26 mm anticorodal aluminum barrel, with an innovative extremely rigid shaft. This combination is a great compromise between structural resilience, low production costs and ease of movement in every direction underwater. It is a very manageable, agile and multipurpose spear gun. Integrated low-friction guide as the barrel only rests on the two outer corners. The lower part is reinforced with additional thickness. This combination enables the spear gun to remain extraordinarily easy to handle while being more rigid than spear guns that are

much larger in diameter. New anatomical butt with integrated minimized load assist, derived from the legendary Apache-Comanche butt, highly resistant, reliable and appreciated by sports fishermen as a model perfect for fast fishing without problems. This proverbially ergonomic and versatile butt is suitable for every type of fishing and shooting from any position. Smooth and fast coupling of the rod and cassette mechanism, tough, reliable and compatible with all types of shafts, tolerant of different heights, finishings and machining.

SIoux

BETTER EQUIPPED FIRST LEVEL GUN

Tried and tested and effective spear guns, the strengths of Sioux guns lie in the excellent materials used, their reliability, the easy firing and the favourable quality-price ratio. The barrel is made from light, non-deformable anti-corrodal aluminium. The inclination of the handgrip is designed for perfect firing and for quick, instinctive aiming; this is covered in rubbersoft. The trigger

system is very gentle and progressive, and is fitted with a safety catch. A strong ring for the line comes out of the bottom of the handgrip, and at the front there are 2 line releasing devices, the dovetail trigger for the reel and a somewhat advanced spear-rail saddle.

APACHE

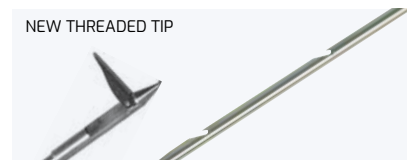

ROBUST AND MINIMALIST

Simplified version of the Navajo model. Open head, robust and minimalist, to optimize the visibility of the shaft. It is a spear gun of competition range, but also adapted to non-professional underwater fishermen, for the incorporation of basic accessories. Anodised aluminium tube 26 mm in diameter.

High resistance to flexion once the rubbers have been tensioned, with the consequent increase in precision. Speargun that stands out for its perfect stability and compensation due to the distribution of weights. 6 mm diameter steel shaft.

SAETTA

SPECIALIZED
Retailer-Product

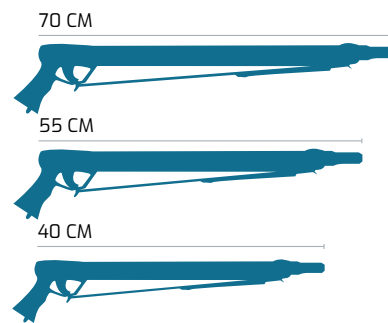

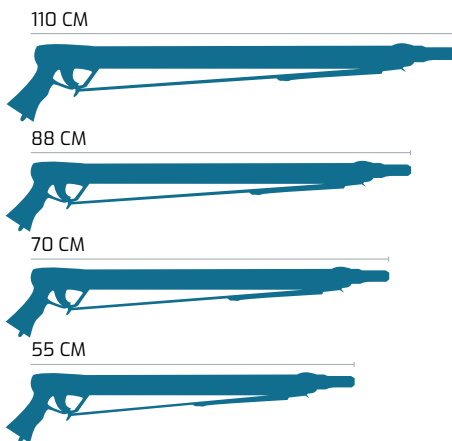

QUALITY & POWER

The Saetta black is the ultimate in pneumatic spearfishing. An upgraded model of the world-renowned Cressi SL series, The Saetta offers unmatched power, comfort and accuracy. A few design tweaks have been able to maximize shot power with high precision and speed. Among the upgrades of the extremely reliably SL series is a new muzzle with incorporated holes to aid in water drainage and a new, soft, angled white handle that also aids in locating the speargun underwater. The Saetta still boasts some of the same

successful features of its predecessors. For one, an anatomical high grip butt that enables the gun to be held in line with the arm. A strong line hook situated on the bottom of the grip butt for shaft loading. Also, a safety catch that frees the line; releasing the device, when the trigger is pulled, and lastly, an Ø 8 mm threaded shaft. The Cressi Saetta is the new standard in pneumatic spearguns. The Saetta is available also with the version with the Power Reducer, a lever that reduces the power of the half, in case of close targets.

TECHNICAL FEATURES

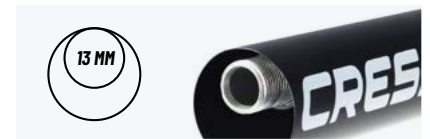

- Internal Ø 13 mm barrel
- Upgraded muzzle with incorporated holes for water drainage
- Upgraded white-colored ergonomic handle
- Safety lock
- Handle eyelet for cord connection
- Threaded shaft Ø 8.0 mm
- Power reducer version available
- Measurements: 70, 55 and 40 cm
- Measurements with reducer: 110, 88, 70 and 55 cm

POWERFULL SHOT

SL STAR

The SL Star range of pneumatic spear guns has been in production for many years now, and they have won **worldwide fame** for their excellence in terms of **robustness, reliability, precision** and **powerful shooting**. The various models correspond to the equivalent models in the SL series, without power reducer. Constantly updated over the years, the SL Star spear guns are ultra light, easy to use, and fire quickly. They come with anatomical high grip butts enabling the gun to be held in line with the arm with no extra effort. The bright red butt means you can identify the gun even if it ends up on the sea-bottom after shooting.

REELS

R20 - R30 - R50

The frame and the central pin are in AISI 316 steel. The drilling on the frame itself allows it to be used also on arbaleta spearguns of different brands. The special clutch provides an excellent closing torque. The assembly system allows easy maintenance

and cleaning. All sizes are equipped with a rewinder ring and size R50 is also equipped with an anti-blocking roller. The models R30 and R50 are equipped with a lightened drum in order to weigh as little as possible on the balance of the speargun.

TECHNICAL FEATURES

- Reel of sturdy construction that combines the resistant Delrin material with assembly elements in AISI316 stainless steel
- Constructed from a single piece of Delrin which is worked by a high precision lathe
- Stainless steel mechanism
- Length for line: 50 m - 160 ft with line Ø 1.5 mm
- Dovetail mounting for quick assembly, compatible with many Cressi rifle models

REELS

FISHING REEL

New Reel for Cressi Spearguns. The Cressi Fishing Reel is a light and quick reel that will fit to the underside of your Cressi speargun with the dovetail mount. A tightening nut will hold the reel from paying out line and small handle help you reel your catch back in. Streamlined, low profile, horizontal line reel tecnopolimer reinforced construction

metal inserts for added durability and strength Adjustable drag knob attaches to standard rail mounts or provided adapter for all rubber spearguns Cressi. Adjustable drag knob allows for easy control of line release reate. Dovetail mounting system.

TECHNICAL FEATURES

- Durable-and-Effective
- Smooth Multi-Adjustable Clutch Style Drag System
- Clutch Style Drag System, Adjustable when Paying-Out Line
- Ergonomic Easily Accessible Star Adjusting Knob
- Vertical Mount Design for Minimal Drag
- Material: Non-Corrosive, Durable and Impact Resistant Plastic
- Dimension: 10.9 x 15 x 9.4 centimeters

TWO-PIECE WETSUIT 5 mm, 7+5 mm

SMOOTH MATERIAL WARMS UP QUICKLY

For effortless breathing and wearability, the most sensitive areas of this wetsuit use a new smooth, dual layer neoprene called "Sandwich Neoprene", which is highly flexible, has great thermal power and at the same time is very study and durable. This neoprene has a 1 mm thick outer layer and a 4 mm (or 6 mm) dual inner layer separated by a

structural elastic lining. Thanks to this technology, it may be sewn to obtain strong seams and will not tear. The wetsuit benefits from a underarm panel that facilitates comfort and wearability. The design is rigorously anatomical. Protective reinforcement on sternum, knees and crotch. Watertight seals in smooth skin on hood, wrists and ankles.

 CRYPTIC CAMOUFLAGE
TECHNOLOGY

TWO-PIECE WETSUIT 5 mm, 7+5 mm

INSPIRED BY THE LIVERY OF THE PELAGIC FISH

A special digital printing system has been used for this new camouflage wetsuit, allowing high-resolution images to be obtained and thus create an exclusive camouflage design. The new "Cryptic Camouflage Technology" of Cressi is based on a real image of a fish (a dolphin fish in this case, with

its dominant colours), to create camouflage that is very close to the original and then altered to obtain a repetitive effect that is one of a kind. The wetsuit is manufactured in two separate 5 or 7 mm pieces (jacket and pants). The materials used are: highly-elastic camo on the outside, open-cell neoprene on the inside.

TECHNICAL FEATURES

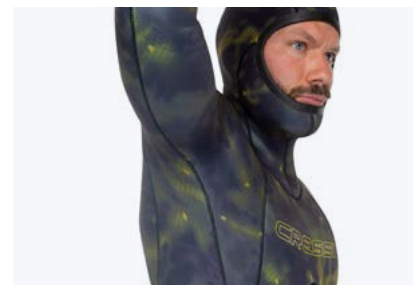

- Preformed anatomical cut
- Jacket with padded reinforcement on the chest
- Watertight seals in smooth skin on hood, wrists and ankles
- Reinforced anti-abrasion lining on the chest and knees
- High-waisted trousers with watertight seals on the ankles and waist

Fisterra was originally born in version 8mm, to respond to the need of professional divers in cold waters. The demand for professional divers, diving instructors and users who demand maximum thermal performance and comfort has encouraged us to incorporate a 5 mm version for temperate waters into the collection.

Fisterra 5 mm is a resistant, very watertight and highly thermal combination with jacket without zippers and high trousers with dungarees. A combination that combines, therefore,

characteristics that place it at the apex of pure performance in a wetsuit of this thickness. Low-compression LC neoprene that guarantees optimum thermal protection at the bottom due to its high resistance to compression ideal for professional work or long duration diving. Nylon outer lining of high weight very resistant, interior X-Plush elastic terry loop, waterproof and great sliding that facilitates the placement and removal of the suit at the same time has a large thermal memory. Wide anti-abrasion knee-spin pads and elbow pads in Supratex®.

TOKUGAWA

MONOPIECE WETSUIT 3 mm

DESIGNED FOR BLUE WATER SPEARFISHING

Tokugawa, named after the Japanese feudal shogunate, is a one-piece 3 mm thick wetsuit, perfect for spearfishing, freediving and swimming, as well as for open water and pool training. The unique camouflage of this wetsuit is appropriate for different aquatic environments, from the blue waters of the Caribbean Sea to the greener tones of North American waters. The wetsuit's graphics provide the ultimate in camouflage for

all environments. Tokugawa, which is made of elastic, flexible, comfortable and soft neoprene, has an anatomically designed cut specific to Cressi wetsuits, with preformed arms and legs that improve wearability and movement in the water. The chest and the knee pad reinforcements are designed specifically for spearfishing. The Dura Stretch nylon lining improves the wetsuit's elasticity, comfort and durability.

COBIA

NEW 2023

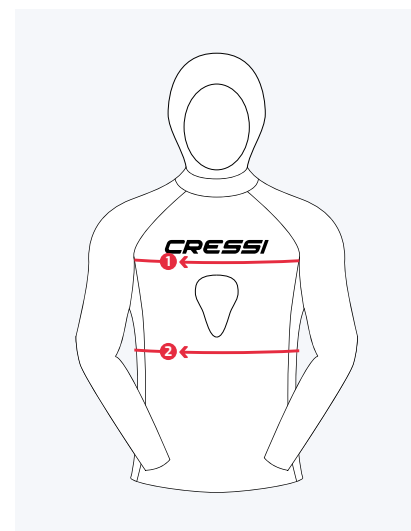

LONG SLEEVES CAMOU RASHGUARD

The Cobia is the ultimate rash guard that features a chest area completely made in 1mm premium Neoprene to provide extra warmth. It's hooded for give the opportunity to protect and to heat also the

head. The Cobia can be worn under a wetsuit for give more warmth and protection. Can be used in any water sports, from windsurfing to scuba diving.

TECHNICAL FEATURES

- The Cobia is the ultimate rash guard that features a chest area completely made in 1mm premium Neoprene to provide extra warmth.
- Hood for head protection.
- Wearable under or over a wetsuit for improve the warmth.
- Available in Cressi's mimetic pattern blue.
- Excellent anatomic cuts.

SARAGO

THERMAL NEOPRENE SOCKS 3 mm, 5 mm

These socks for fins with strap or foot pocket are made of soft highly elastic nylonlined NEW camouflage neoprene 3 mm. They prevent heat loss and keep feet warm.

The smooth skin neoprene on the ankle allows maximum adherence between the sock and the leg of the wetsuit, reducing the passage of water.

The sole is entirely non-slip. The construction of the blind stitch seam further improves comfort and aesthetics.

GARA TURBO CARBON

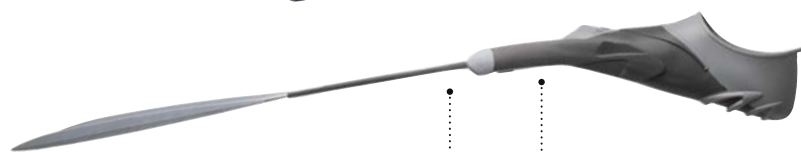

SPECIALIZED
Retailer-Product

HIGH PERFORMANCE COMPACT FIN RAILS

Following the Impulse project we have successfully transferred the same design parameters for S-shaped undulating deformation to this innovative carbon fin. This particular movement permits a notable accumulation of elastic potential energy in the blade, which is released in the return kick, transforming into thrust. The effect has been achieved using a finite elements programme that enables the performance offered by carbonfibre to be exploited to the full. The blade is all-carbonfibre with an angle of 29°. The fibre is imported from Japan. The shaped and processed sheet is then produced in a specialist plant in Turkey. The blade is subsequently finished with an industrial

co-moulding process at Cressi's Genoa plant. The elevated chemical bonding achieved between blade and rail, effectively creating a single piece, has permitted the elimination of the rigid glue that prevented the carbonfibre blade from flexing naturally. The thermoplastic rubber used for the water channelling rails is extremely flexible and soft so as not to undermine the intrinsic characteristics of the carbonfibre. The blade is therefore less fragile and more protected by the rubber. The end result is a very light fin, with every square millimetre exploiting the flexibility of the carbonfibre to the full.

29° DEGREE ANGLED

SHORTER FOOT POCKET

TECHNICAL FEATURES

- 29 degree angled interchangeable carbon blade
- Modular detachable fin
- Superior performance
- Superior comfort
- Self adjusting foot pocket

**GARA TURBO
FOOT POCKET**

INCLUDED GARA MODULAR INSOLE

The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

- Down-size Gara Fins foot pocket preformed sole
- Easily adjust size
- Non- corrosive plastic construction

NEW 2023

SUPERIOR PERFORMANCE CAMOUFLAGE FINS

The blades are made with an ultra performing carbon fibre of incredible strength and flexibility. The fabrication of this carbon fiber is done with an high vacuum 100% industrial procedure, to obtain an exceptional compactness of the carbon fibre.

Average carbon fibre used for fin blades in the industry has 3.000 fibers per thread. Our Carbon has 12.000 fibers per thread. Four times as much. Four times the resistance. Four times the flexibility and elasticity, kick response compared to other

carbon blades on the market. Each thread in this carbon fiber is very very small. So small that the TOTAL DENSITY of the blade is an incredible, and unmatched, 20.000 fibers per square millimeter.

XLD

High flexibility blade

Dedicated to those divers who prefer a very soft and smooth fin. It is indicated if your fishing sessions include long sessions and if you cover long distances.

MD

Medium flexibility blade

It is perfect if you fish using a boat to move from spot to spot, using a constant weight.

HF

Stiff blade

It is ideal for strong, powerful athletes with a higher bodyweight. It is also useful in waters with strong currents and when fishing in rougher sea conditions.

SHORTER FOOT
POCKET

HIGH PROPULSIVE
PERFORMANCE

SHORTER BLADE

HIGH PERFORMANCE COMPACT FIN RAILS

The new Gara Turbo Sprint fin is a shorter version of the Gara Turbo fin. Sprint is designed to meet the needs of freedivers and spearfishers who practice this sport in wintertime and when a blade as long as Impulse is not necessary. Both fins have been designed using expensive finite element software programs that allow highly complex and equally high-performance sections to be defined. The blade of Sprint, like the Impulse blade, is made

of a single thermoplastic elastomer, although it would be more correct to refer to an angled sublayer and an overlay. The sublayer follows the shape and dimensions of almost the entire fin. It has a uniform thickness and a flexible longitudinal propulsion wing of variable length. When disassembled, the blade and foot pocket occupy the space of a normal snorkeling fin.

WATER RAILS SYSTEM

TECHNICAL FEATURES

- Excellent propulsive performance without tiring anyone, beginners or professionals
- Thermoplastic rubber foot pocket, certified Full Contact
- Standard blade/stringer interface with screws under the foot pocket and side clips
- Extremely thin and light blade in compound made of elastomerized technopolymers developed by Cressi with different thicknesses
- Stringer consisting of technopolymers with elastomeric loads with high flexural modulus
- Foot pocket/blade angle of 29 degrees
- All fin components are also supplied separately.

GARA TURBO

FOOT POCKET

SUPERIOR MANEUVERABILITY

The new Gara Modular Sprint fin is a shorter version of the Impulse fin, which proved to be hugely popular with freedivers worldwide, both amateurs and the most demanding professional freedivers. This is also confirmed by the large number of articles dedicated to it by specialized journalists in sector magazines. Sprint is designed to meet the needs of freedivers and spearfishers who practice this sport in wintertime and when a fin as long as Impulse is not necessary. Both fins have been designed using expensive finite element software programs that allow highly complex and equally high-performance sections to be defined. The blade of Sprint, like the Impulse blade, is made of a single thermoplastic elastomer, although

it would be more correct to refer to an angled sublayer and an overlay. The sublayer follows the shape and dimensions of almost the entire fin. It has a uniform thickness and a flexible longitudinal propulsion wing of variable length. In contrast, the so-called overlay covers the propulsion wing selectively and has a thickness that slopes from the maximum value to zero longitudinally towards the tip of the blade. As a result, the fin offers a new way of storing and releasing elastic potential energy, greatly assisting movement of the freediver's legs and thus guaranteeing a net improvement in propulsive output. When disassembled, the blade and foot pocket occupy the space of a normal snorkeling fin.

TECHNICAL FEATURES

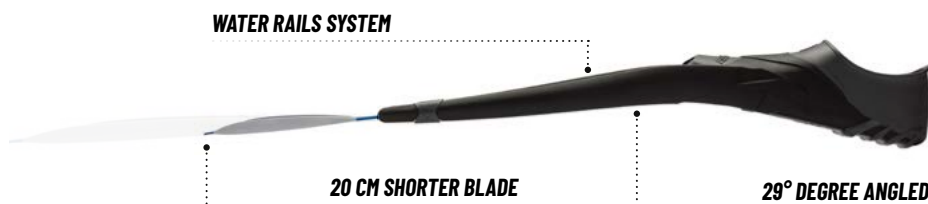

- Excellent propulsive performance without tiring anyone, beginners or professionals
- Thermoplastic rubber foot pocket, certified Full Contact
- Standard blade/stringer interface with screws under the foot pocket and side clips
- Extremely thin and light blade in compound made of elastomerized technopolymers developed by Cressi with different thicknesses
- Stringer consisting of technopolymers with elastomeric loads with high flexural modulus
- Foot pocket/blade angle of 29 degrees
- All fin components are also supplied separately.

GARA MODULAR GREY

SOFTER LD BLADE

The GARA MODULAR GREY is a perfect choice for deep freediving and spearfishing for divers of all levels. The modular design lets the user replace/interchange blades for specific diving purposes, which make the perfect fin to grow with, as the diver can change blades as the divers skills increase. Any standard Fiberglass or Carbon Fiber long blade will interchange in minutes without any modifications to either. The self adjusting footpocket is constructed with the most modern

multi compound joining process to deliver a footpocket that can offer comfort and suppleness around the foot where desired and yet have stiffer compounds under the footpocket and heel area where power transfer takes place. The angle of the blade provides the ultimate in efficiency during the kick cycle requiring less energy to load the blade. Can be comfortably worn with or without neoprene socks.

LONG DISTANCE - SOFTER THERMOPLASTIC BLADE
MINIMUM EFFORT »» MAXIMUM POWER TRANSFER

FOOT POCKET

Gara Modular's foot pocket is wider than the other gara fin models. We suggest to use it with neoprene socks in order to have a proper fit. For use without neoprene socks, we recommend to buy one smaller size.

SUPERIOR COMFORT | SUPERIOR PERFORMANCE | INTERCHANGEABLE BLADE | SELF ADJUSTING FOOT POCKET

INCLUDED GARA MODULAR INSOLE

The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

- Down-size Gara Fins foot pocket preformed sole
- Easily adjust size
- Non- corrosive plastic construction

GARA 3000 LD

SOFTER LONG BLADE

GARA 3000 LD is CRESSI's entry-level long blade fin designed with softer blades, which make the GARA 3000 a perfect choice for the beginning diver or those not familiar using long blade fins. The GARA 3000 is constructed with durability in mind and long soft plastic blades that can effectively transfer power with minimum effort, which make this fin very comfortable and easy on the legs for the beginner or during long duration dives.

The GARA 3000 is an extremely comfortable and is a full footpocket style fin. This fin is also constructed using CRESSI's unique three material molding process where different compounds are bonded together to provide flexibility in the foot area and while being able to deliver power thru the blade due to the stiffness that the multi compound molding process can provide. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- Durable construction designed for extended use
- Soft long blade for less swimming effort
- Comfy full footpocket
- Cressi three material molding technology

GARA 2000 HF

STIFF LONG BLADE

GARA 2000 HF is a staple in the diving industry, and is the first fin in the industry to be manufactured using a three material molding process. Due to its lightweight and durability, it is an excellent choice for those looking for a fin that can provide the ultimate in performance while deep freediving and spearfishing, and those looking for obtaining maximum depths. The GARA 2000 has the stiffest blade in the CRESSI line and is an

extremely comfortable full footpocket style fin, with long firm blades with built in stringers and runners to effectively direct water flow down the blade aiding in efficiency. This fin is constructed using multiple compounds bonded together to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- Stiff long blade designed for reach max depths
- Comfy full foot pocket
- High performance long blade

GARA PROFESSIONAL LD

LONG DISTANCE

The Gara Professional LD is a high performance fin, requiring minimum effort to load the long blades. They are more forgiving than other long blade fins for untrained legs, making this an excellent choice for deep free divers and spearfishers of all levels. They are ideal for long distance swimming, while ultimately providing the power and efficiency needed for deep free-diving and spearfishing. Due to the multi compound bonding process used

during the manufacturing process, the Gara Pro LD is an exceptionally soft full footpocket style fin, which provides comfort during prolonged use on those long days in the water. Gara Pro LD delivers maximum power with minimum energy through its long firm blade that runs over the footpocket. Can comfortably be worn with or without neoprene socks.

NEW 2023

ULTRA LOW VOLUME MASK

Atom is a radical mask, with incredible low internal volume, thought and built for free-diving. It is a frameless mask. Construction material has been reduced to the minimum. Inside the silicon facial a stiff core is co-stamped with the two lenses, giving just the right rigidity to the mask. This semi-rigid core substitutes the usual external plastic frame and allowed us to reduce the internal volume of the mask in an unseen way until today.

Another feature of Atom is the ergonomic shape of the nose. Two small cavities, carved by the nostrils, facilitate the action of compensation. This makes the mask extremely stable during the dive. Atom will not move when you compensate pushing Atom is the perfect mask for the expert free-diver and spear-fisher, who wants the maximum performance from its gear.

DOUBLE INJECTION SILICONE STRAP

QUANTUM

**SPECIALIZED**
Retailer-Product**NEW COLOR 2023**

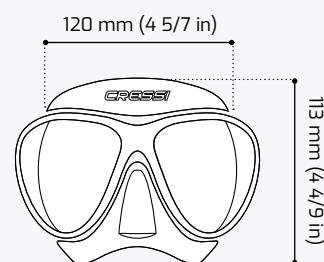

NEW REVOLUTIONARY ANTI-FOG SYSTEM

The major innovation with the Quantum mask is that as well as offering enhanced downwards vision it avoids the fogging phenomenon through the internal thermoregulation of the warm, damp air exiting the nose. This air is channelled by a system of membranes set in the moulding around the eyes and nose and deviating the flow towards the rubber skirt rather than the lenses.

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators. The effect is that the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up. Despite the presence of the small internal

membranes deviating the air flow and the external heat exchangers, the body of the Quantum mask is nonetheless compact and represents the most advanced design offered on the underwater vision market.

The lenses are not treated chemically and it should be remembered that when the mask is new, as is the case with all masks, we advise you to clean the

INNER MEMBRANES + HEAT EXCHANGER

INNER MEMBRANES

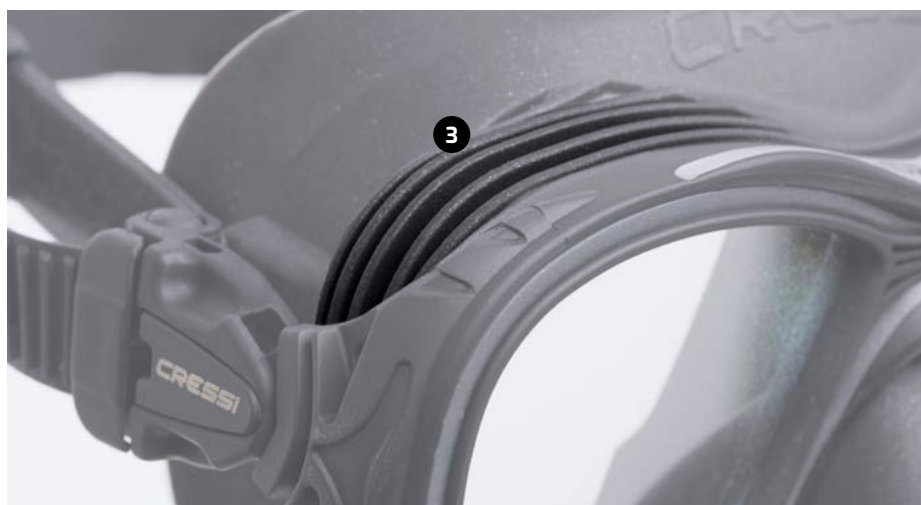

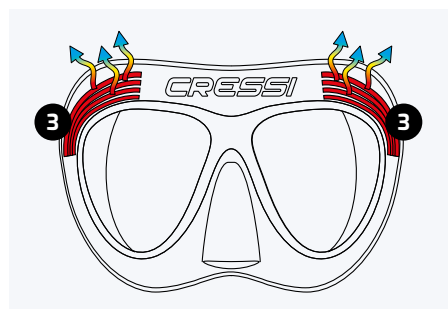

A patented membrane surrounding the inner nose pocket (1) and both the inner eyes pockets (2) which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.

HEAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators (3). Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

FOG STOP SYSTEM

Zeus is the perfect mask for diving. This mask has a particular tapered structure deriving directly from the highly popular Nano-mask patent. The same IDF-INTEGRATED DUAL FRAME TECHNOLOGY SYSTEM allows you to join the silicone skirt to the lens frame without major interruptions of the

curvature continuity. The result is a mask with an extremely hydrodynamic shape and, visibility being equal, a significantly smaller size. The field of view obtained is particularly wide, laterally and in the lower zone. Thanks to its matte coating the mask's components all match, enhancing the underwater

experience since it prevents reflections in the water that may disturb marine life. The new micrometric adjustable buckles with a larger button allow a more easily regulation also wearing dive gloves. The new strap is made of two different silicone colors.

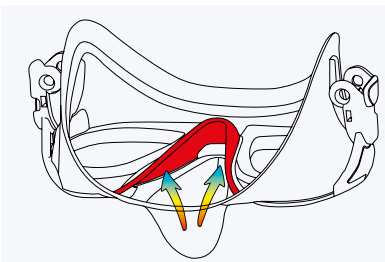

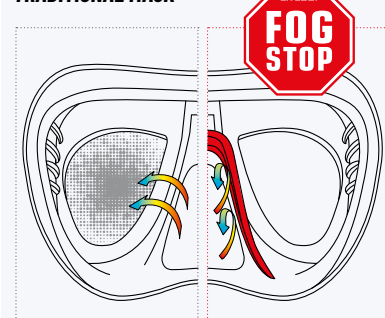

FOG STOP SYSTEM

INNER NOSE POCKET - NEW PATENT PENDING

A patented membrane surrounding the inner nose pocket which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.

CALIBRO

FOG STOP SYSTEM

Cressi's next generation diving masks are all equipped with the IDF-INTEGRATED DUAL FRAME TECHNOLOGY which offers exceptional field of view, and the new Calibro is no exception. The mask is designed so that the integrated face and frame allow for an extremely hydrodynamic and compact shape and a particularly wide lens, maintaining the mask extremely close to the face. Cressi's Calibro combines minimal internal volume with a phenomenal field of view due to the raked angle of the frame. The buckles are, as always,

directly integrated into the rigid skirt through a solid but flexible rubber attachment that allows you to adjust and place the mouthpiece without shifting the mask. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. Calibro is the perfect mask also for free-diving since it is designed to provide the diver with a feeling of total freedom and comfort.

TRADITIONAL MASK

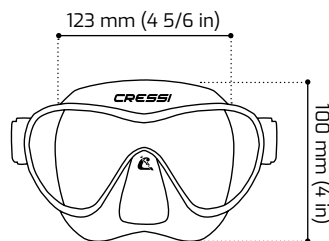

FRAMELESS TECHNOLOGY CRESSI | MICROMETRIC ADJUSTABLE BUCKLE | TEMPERED GLASS | 100% HIGH QUALITY SILICONE SKIRT

LOW VOLUME FRAMELESS MASK

Z1 is a frameless mask that boasts a low internal volume while offering a wide field of view in all directions. The specific design uses the assembly of the silicone skirt directly over the single glass. This system guarantees great sturdiness and a perfect watertight seal.

The lower weight of the mask makes it ideal for travel. The flexible fit and reduced drag are appreciated for freediving and spearfishing, snorkeling and diving. The micrometrically adjustable buckles are comfortable and effective.

GRAPHITE

BLACK

BLUE

TECHNICAL FEATURES

- Low-volume, single lens design for a wide field-of-view
- Frameless: silicone skirt bonds directly to the lens for lower weight and reduced drag
- Fast-adjust ratcheting strap buckles mounted to skirt
- High-grade silicone seals
- Tempered glass lens
- Easy-access nose pocket for equalization

SMALLER VERSION OF Z1 MASK

ZS1 is the Small version, suitable for adults with small faces, of the Z1, a frameless mask that boasts a low internal volume while offering a wide field of view in all directions. The specific design uses the assembly of the silicone skirt directly over the single glass. This system guarantees great sturdiness and a perfect watertight seal.

The lower weight of the mask makes it ideal for travel. The flexible fit and reduced drag are appreciated for freediving and spearfishing, snorkeling and diving. The micrometrically adjustable buckles are comfortable and effective.

BLACK

KHAKI

TECHNICAL FEATURES

- Low-volume, single lens design for a wide field-of-view
- Frameless: silicone skirt bonds directly to the lens for lower weight and reduced drag
- Fast-adjust ratcheting strap buckles mounted to skirt
- High-grade silicone seals
- Tempered glass lens
- Easy-access nose pocket for equalization

PENTA+ NEW 2023

UNPRECEDENTED TOTAL VISION

The Penta+ is the restyling of the popular Penta mask. It has four lenses and also introduces to this sector all the exceptional characteristics of the Matrix and the Lince. The Cressi patented system of raked lenses with an "inverted drop" shape offers incredible downward visibility, ideal for having under control the scuba diving equipment. The

clear side windows are made of scratch-resistant material, more strong than glass or polycarbonate. Thanks to them, the mask offers unprecedented lateral visibility and great luminosity for total vision with no compromises. The skirt and the strap are made of hypoallergenic silicone, a very soft material compared to the low-quality PVC,

that ensures a perfect seal and comfort. The buckles are embedded in the frame to offer instant adjustment of the strap length, even with one hand. It offers a very low internal volume, a record weight of only 175 g (6.2 oz).

TECHNICAL FEATURES

- Type: four lens mask
- Front lenses: inverted teardrop design to ensure maximum visibility, made of tempered glass
- Strap buckles: pressure, with instant adjustment
- Very low internal volume
- Weight: 175 g (6.2 oz)

MINIMA

THE LOWEST VOLUME ON THE MARKET

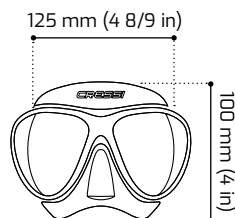

This mask was designed specifically for deep sea diving, with innovative features that place it at the top of its category. The special reduced skirt, complete with a small seal ring, sticks like a suction cup to the face, leaving minimum air space inside the mask, which make compensation extremely easy, taking very little air from the lungs.

The lens-eye distance is the absolute smallest on the market and guarantees, even with small diameter lenses, excellent visibility in all directions. The two optic glass lenses are thicker than the standard to allow a special safety mould. The strap comes with instantly adjusting buckles for an easy and precise fit.

SUPEROCCHIO

CLASSIC LOW VOLUME MASK

A huge classic in Cressi masks, it continues to be a favourite among fans even though it has been in production for many years. It's a small mask with minimum internal volume, very well suited for

deep freediving. The size of the skirt is limited, and the mask adapts easily to many facial shapes. The two separate lenses, placed very near the eyes, offer great visibility in every direction.

TECHNICAL FEATURES

- Minimum internal volume
- Suitable for deep freediving
- The size of the skirt is reduced, and the mask adapts easily to many facial shapes
- The two separate lenses, placed very near the eyes, offer great visibility in every direction

CORSICA

ULTRA FLEXIBLE

CORSICA is a new highly technical snorkel designed specifically for deep freediving and spearfishing. The soft bendable large diameter tubing makes it extremely comfortable to properly position behind the head while maintaining ease of breathing on the surface. When diving, the mouthpiece tucks neatly under the chin for the ultimate in hydrodynamics. The anatomical hypoallergenic silicone mouthpiece provides extreme comfort during long durations in the water. The CORSICA is available in either black or green and is an excellent choice for the discriminating diver who is looking for the best equipment.

SNORKELS

MEXICO

WITH SPLASH GUARD

SPLASH
GUARD

The Mexico snorkel is a high-end tube specifically studied to form a perfect fit on any face shape and features a completely rounded progressive profile. The upper baffle reduces water entrance due to waves with a design created to avoid damaging the air inlet flow. It has a transparent tube in a very flexible polyurethane with a mixed matte-gloss texture. The section of the tube walls is studied to maintain the necessary stiffness in the pressure zone of the mask strip to support air circulation in this area. It has a very comfortable mouthpiece with a design that combines different thicknesses to favor its self-orientation and relieve the tension of the user's jaw after long use. The nozzle/tube connection is especially safe against possible accidental separation. Versatile for use placed on the left or right side of the face. The snorkel keeper it is easy to have fixed to the mask for securing it.

BLACK	EG269550	6		11,99

AMERICA

EXTREME COMFORT

AMERICA is a snorkel specifically designed for deep freediving and spearfishing. This snorkel provides excellent surface breathing properties due to its shorter, large bore flexible tubing with minimal curves to maintain a proper position around the head. The multi-positional soft silicone swivel mouthpiece can be tuned at any angle to provide extreme comfort during long durations in the water.

TECHNICAL FEATURES

- The multi-positional silicone soft mouthpiece provides extreme comfort during prolonged use
- Large diameter Snorkel Tube provides unobstructed ease of breathing
- Minimal tube and mouthpiece bends provides easier clearing capability

BAGS & BACKPACKS

TUNA

WHEELED BAG - FITS LONG BLADE FINS

The Tuna bag has a rigid bottom, thanks to the structure that supports the rubber and anti-breakage wheels. It is designed to carry diving equipment more comfortably. The material is water-repellent, even if not watertight. All metal components are made of rustproof stainless steel. The capacity is 120 litres. It is equipped with

a large internal mesh pocket with zip and a small external pocket with zip. Three inner straps are attached to the bottom of the structure to secure the equipment. At the top end there is a handle for towing and another handle is at the bottom end. In the middle of the bag, two more handles can be joined with a padded strap.

PIOVRA XL

LONG BLADE FINS BACKPACK WITH WATER REPELLANT TREATMENT

The Piovra backpack bag is perfect for sport spearfishing equipment. It is made of water-repellent DRY material, even if not watertight. The main compartment, with breathable anti-moisture mesh at the bottom, can accommodate freediving fishing gear, such as wetsuit, long fins (up to 100 cm / 39.37 in), mask, mouthpiece, belt, knife and various accessories. The secondary compartment, i.e. the outside pocket, is as a "cool" type

refrigerator bag for the transport of cold drinks or fish. The external elastic with braided laces allows to insert other objects, such as the towel. The two sides are equipped with fixing systems for two spearguns. There is a D-ring at the top of the bag. The two carrying straps are adjustable and a side handle makes it easier to grip. A reflective print on the front ensures greater visibility. The main compartment has eyelets for padlock.

DIVE TORCHES

/ DIVE TORCHES

LUMIA+

ULTRA LED DIVE LAMP

Torch with a highly asymmetric design boasts excellent ergonomics and a highly tactile perception of its geometric characteristics. Thanks to this particular design, the switch position is immediately found without needing to use your eyesight. The porthole and body are coated with thermoplastic rubber to extend shelf life and reduce noises from impact when used for fishing. These ergonomic features are a big advantage over aluminium torches with a circular section which do not give feedback on the position of the grip and, in some cases, even require the use

of two hands to turn it on. The switch has three positions: Off, On Unstable with Automatic Return, On. The "On Unstable" position is particularly useful in fishing because it allows flashing by one simple press. The strap with slider spring allows adjustment according to the user's needs, but being elastic can be pulled out in case of emergency. Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The electronics ensure a constant level of brightness even when the batteries are rechargeable and/or not fully charged. Batteries included.

NEW WHITE COLOR TEMPERATURE

The LED has a white color temperature similar to sunlight for maximum return of the colors in the underwater environment. The light beam of the LED is narrowed into a spot light beam of about 6° by means of a lens made of ultra-transparent material protected by the polycarbonate optical porthole.

ACTIVE ELECTRONICS

Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The power supply has an electronic management system that eliminates the gap between the different electrical potentials of different types of batteries and ensures an efficiency of 30% higher than the commonly used systems. The active electronics of the flashlight guarantee constant light, even when the battery charge decreases. When the charge drops below the safety threshold value, the lighting level will reduce to warn the user that the batteries are depleted.

KILLER

STAINLESS STEEL

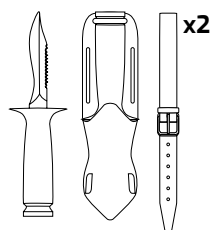

A small knife that's been around for years now, highly appreciated because it is easy to handle and the blade penetrates really well. This is forged from a single piece of stainless steel, and is blocked at the grip by a screw knob situated at the end of the grip. One side of the blade has a smooth cutting edge, the other is partly serrated.

The anatomical technopolymer grip ends at the blade with a thumb tab. The sheath is made from plastic and has a traditional elastic band to hold on the knife and loops to attach the knife to your leg or onto your belt.

The knife comes with two, standard issue straps to attach it to your leg.

Blade length	8,6 cm - 3.39 inch
Total length	18 cm - 7.09 inch

GRIP

STAINLESS STEEL 304

The Grip Spear is a small-sized knife with a tapered blade that makes it ideal for spearfishing.

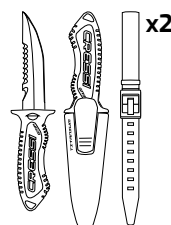

The blade is made in stainless steel. It features a high precision dagger point tip. One side is an extra rigid serrated blade for sawing, the other side is a skillfully crafted straight blade. It features an ergonomic non-slip handle grip and a hole to add a lanyard (not included).

The knife comes with a sheath that can be attached to the BCD shoulder strap. The sheath has a locking mechanism that prevents the knife from falling out. With 2 rubber straps (included) you can fix the sheath to your leg or your arm. The straps are 20 in (50.8 cm) long.

Great for spear fishing or scuba diving; as primary knife or back-up.

BUOYS

SIGNAL BOARD BUOY

PVC WITH MESH COVER + 0.25 MM INNER BLADDER | 20 M LINE | CARRYING HANDLE | FLAG WITH 40 CM POLE | 4 POCKETS | SAFETY WHISTLE

Red for excellent visibility, it uses two casings: an outer skin made of abrasion-resistant material ensures excellent protection for the two inner inflatable chambers, which are white. A mesh cover makes the bottom abrasion-proof and ensures effective drainage so that the buoy retains its light weight at all times. The upper part is fitted with multipurpose pockets and a big expanding container. A mesh bag made of adjustable elastic straps will carry additional objects. A zipper along the centre gives access to the two air tubes, which are kept separate for fail-safe buoyancy. A casing for the pole of the flag required by regulations is provided in the centre of the front section of the float. Also Red, the line is about 20m long and is fitted with two plastic snap hooks. This buoy comes with a convenient whistle: an additional safety device.

SPYDER BOARD BUOY

BRIGHT RED COLOR FOR MAXIMUM VISIBILITY | FLAG WITH 40 CM POLE | 4 POCKETS

The buoy is double chamber type with an inner tube and an external protective cover. It is made from abrasion-resistant 420D nylon. Fluorescent red colour makes it highly visible. Holds 3 rifles. Buoy dimensions: 80 cm x 30 cm. The buoy has a double internal chamber to increase your safety. If one is pierced, the buoy will always be on the surface thanks to the other chamber. The three pockets are very practical for storing various accessories. A stabilising lead makes this buoy very stable even with the sea formed and with the top compartments occupied by heavy objects.

TORPEDO BUOY

BRIGHT RED COLOR
FOR MAXIMUM VISIBILITY

CLASSIC TORPEDO
SHAPED BUOY

0.35 MM
PVC

The PVC used for this mono-camera buoy is very thick (0.35 mm) and is highly resistant to stress from sea activities. High-quality heat welded connections. The torpedo shape is very convenient for swimming because it eliminates any hydrodynamic resistance. It has a super slip tray finish, so that the buoy is the minimum resistance to the angler's progress. It is also very comfortable for rifles that can be positioned lengthly. Pole with "Diver Underwater" flag and 25 m rope.

Diameter	25 cm - 9.85 inch
Height	85 cm - 33.46 inch
Volume	about 15 L
Weight	680 gr - 1.5 lb

PRODUCT	CODE		RRP
TORPEDO BUOY	TA611600		25,99

EASY BUOY

WRAP-AROUND
SYSTEM

20 M
LINE

0.35 MM
PVC

First-ever buoy to feature a built-in flag, it is fitted with a specially designed casing for the line that prevents the line from tangling up and makes it possible to adjust its length as a function of how deep you want to go. Pursuant to the regulations, its prevailing colour is red with a white stripe for immediate recognisability. Also red in colour, the line is about 20m long and is fitted with two plastic snap hooks. This buoy comes with a convenient whistle: an additional safety device that can be used to attract attention in an emergency situation.

COMPETITION BUOY

BRIGHT RED COLOR
FOR MAXIMUM VISIBILITY

CLASSIC
ROUND BUOY

0.35 MM
PVC

This spherical float is slightly flattened to offer less wind resistance and has a built-in inflatable flag. Made from PVC, it has a strong anchor point for attaching the line on the lower half. It is supplied complete with a light 25 m floating line that has a small cylindrical lead weight of 150 g.

Diameter	30 cm - 11.81 inch
Height	23 cm - 9.05 inch
Volume	about 7 L
Weight	380 gr - 0.84 lb

BELTS & ACCESSORIES

CRESSI

MARSEILLAISE

PREMIUM RUBBER BELT

Rubber weight belt with stainless steel buckle. Because it is made from a stretch material, the belt automatically tightens up during descent, when it generally loosens due to abdominal pressure and the reduction in the thickness of the wetsuit. Consequently the belt always fits snugly against

the diver in every phase of the dive. The quick-release stainless steel buckle provides instinctive and rapid emergency release. The buckle pin passes through, is very strong and is riveted at both ends.

CODE		RRP
TA626000		49,99

MALTA

QUICK RELEASE ELASTIC BELT

Rubber weight belt with Marseillaise stainless steel buckle. Because it is made from a stretch material, the belt automatically tightens up during descent, when it generally loosens due to abdominal pressure and the reduction in the thickness of the wetsuit. Consequently the belt always fits snugly against the diver in every phase of the dive. The Marseillaise stainless steel buckle has a tilting check pin that fits into the holes situated at regular intervals along the belt. Secure grip and quick emergency release.
